13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones, attach the Bond under which the work will be performed or provide the Bond No. on file with IDL. Required subsequent reports shall be filed within 30 days following completion of the involved operations. Final Abandonment Notices shall be filed only after operations. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

(Phase 1 of potentially 3 phases:)  
Move in wireline unit. Run gauge ring tools to determine plug back total depth and to determine any restrictions in the wellbore. Take downhole pressure and temperature measurements to determine static bottom hole pressure and temperature. Run sample bailers, as necessary to collect samples of wellbore materials for analysis.

Phase 2 and Phase 3, of planned work, will be to move in workover rig and/or flow test the well. Future Sundry Notices will detail those plans as they become visible, based on the results and analysis of Phase 1.

14. I hereby certify that the foregoing is true and correct	
Name (Printed/Typed) Dale R. Hayes	Title VP - Operations
Signature <i>Dale R. Hayes</i>	Date 8/11/12
